- Javascript Framework: AngularJS, ReactJS, VueJS, Typescript
- Containerization: Docker
- Event Streaming: Azure Service Bus, AWS Simple Queuing Service
- Package management: npm, nuget
- Communication framework: WCF, Socket, WebSocket, SignalR
- Database: MySQL, SQL Server, SQL Lite, Oracle, NoSQL (Azure DocDB, AWS Aurora & DynamoDB), AWS RDS
- ORM: Dapper, Entity Framework, Entity Framework Core
- Background Job: Azure Function (Serverless)
- Reporting: Crystal Report, Active Report
- Azure: Azure Function, Service Bus, Table Storage, Blob Storage
- AWS: Lambda, S3, Cloudfront, EC2, DynamoDB, ElasticBeanstalk, CloudFormation
- CICD: Azure DevOps, AWS CloudPipeline
- Testing: NUnit, xUnit, Selenium, Postman

- IDE: Visual studio, Visual studio code
- Architecture tools: Power Designer, Enterprise Architect, Visio, Powerpoint, etc.
- Coding principle: Clean architecture/clean code, follow best practices, design pattern, apply coding principles: SOLID, KISS, YAGNI, etc.
- Architectural patterns: MVC, MVVM
- Methodology: Waterfall, Agile, Scrum

EDUCATION

- Bachelor of Science in Information Technology, STI College - Marikina, Marikina City, Philippines

WORKING EXPERIENCE HIGHLIGHTS (Pinion Software Consulting and Apps Inc.)

We Select - Top recruitment agency in Sweden

Project: **We Select Talent Software** *(November 2019 – Now)*
Revamp the old web application to improve overall performance and design UI/UX for users (recruiters and managers).

Roles: **Senior .NET Developer**
- Develop new features for the system
- Write technical documents, prepare coding guideline, coding best practice for team
- Involves in project planning and discussion
- Technologies: C# .NET Core, SQL Server, Azure (Blob, Tables, SQL, Service Bus, Functions, App Insights), React, Twilio Sendgrid, Facebook Marketing, Auth0, Microservice, Jira CI/CD

WORKING EXPERIENCE HIGHLIGHTS (Yondu Inc. - Accenture Philippines)

SOPHOS - One of the best CyberSecurity

Project: **SOA Service Oriented Architecture** *(December 2017 – October 2019)*
Integrations Team - provides middleware services, integrations and support for all of the company's applications.

Roles: **Senior .NET Developer**
- Develop, review, test and deploy system enhancements and integrations
- Implement design patterns and system standards
- Technologies: C# .Net Framework, AWS (Lambda, S3, Cloudfront, EC2, DynamoDB, ElasticBeanstalk, CloudFormation, SQS), Atlassian (Jira, Wiki, Stash, Confluence, CI/CD), Salesforce, Cast Iron

ALTUS TRAFFIC - Australia's Largest Provider of Professional Traffic Control Services

(July 2016 – September 2017)

Project: Alloc8 ERP System

ERP System in handling Projects, Sales, Resource Management, Client Management and Reporting.

Roles: FullStack Developer (.NET)
- o Develop application enhancements and features
- o Follow design patterns and system standards
- o <u>Technologies</u>: C# .Net Framework, DocDB, Azure Service Bus, Redis Cache, ReactJS

Project: My Altus Traffic Mobile App

Simple scheduling and incident reporting mobile app for traffic controllers.

Roles: Mobile Developer
- o Create project from scratch, designed the app UI and functions
- o Develop the app server Web API for to communicate to app service
- o Develop scheduler job for system background service
- o <u>Technologies</u>: C# .NET, Xamarin Forms, Push Notification Service (Apple, Google), Web API, Tokens, SQL Server, Window Service
